

# Sol-Go Flexible Solar Panel

## Different and Better

### Sol-Go

- Founded in Silicon Valley, California.
- Set up by the team which designed, developed and supervised production of SunPower flexible panels.
- Offering Sol-Go flexible panels and kits in the US and Europe. Now 100W/115W, 145W/160W panels are available.
- Support in custom design solutions for off-grid system at high quality and reasonable cost.

### Different and Better Products

- Designed and engineered in the US.
- Unique design and craftsmanship.
- Rigorously tested functionality and durability to ensure a long module lifetime.

### Powerful, Portable and Reliable

- Made with Maxeon prime monocrystalline IBC solar cells and premium materials from top-rated suppliers.
- Simple, quick installation, lower cost.
- Easy maintenance and upgrading.

### Designed for Extraordinary Challenges

- Better performance under higher temperature, low-light and shading conditions.
- Produces 35% more energy and having up to 50% lower power losses compared to conventional solar cells.
- Waterproof components. No saltwater warranty exclusions.

### Bringing Peace of Mind

- Sol-Go provides 5 year power warranty, 2 year product warranty.
- More modules with longer warranty will be available soon.
- Customer support teams are in North America, Europe and Asia.

Sol-Go has successfully done many cases for the following applications, and there will be more ...
